- » **COMING SOON!** Fitwel Certification

A Durham Landmark

In the early decades of the 1900s, Durham acquired a national reputation for entrepreneurship. Businesses owned by African Americans lined Parrish Street, and among them was North Carolina Mutual Life Insurance Company.

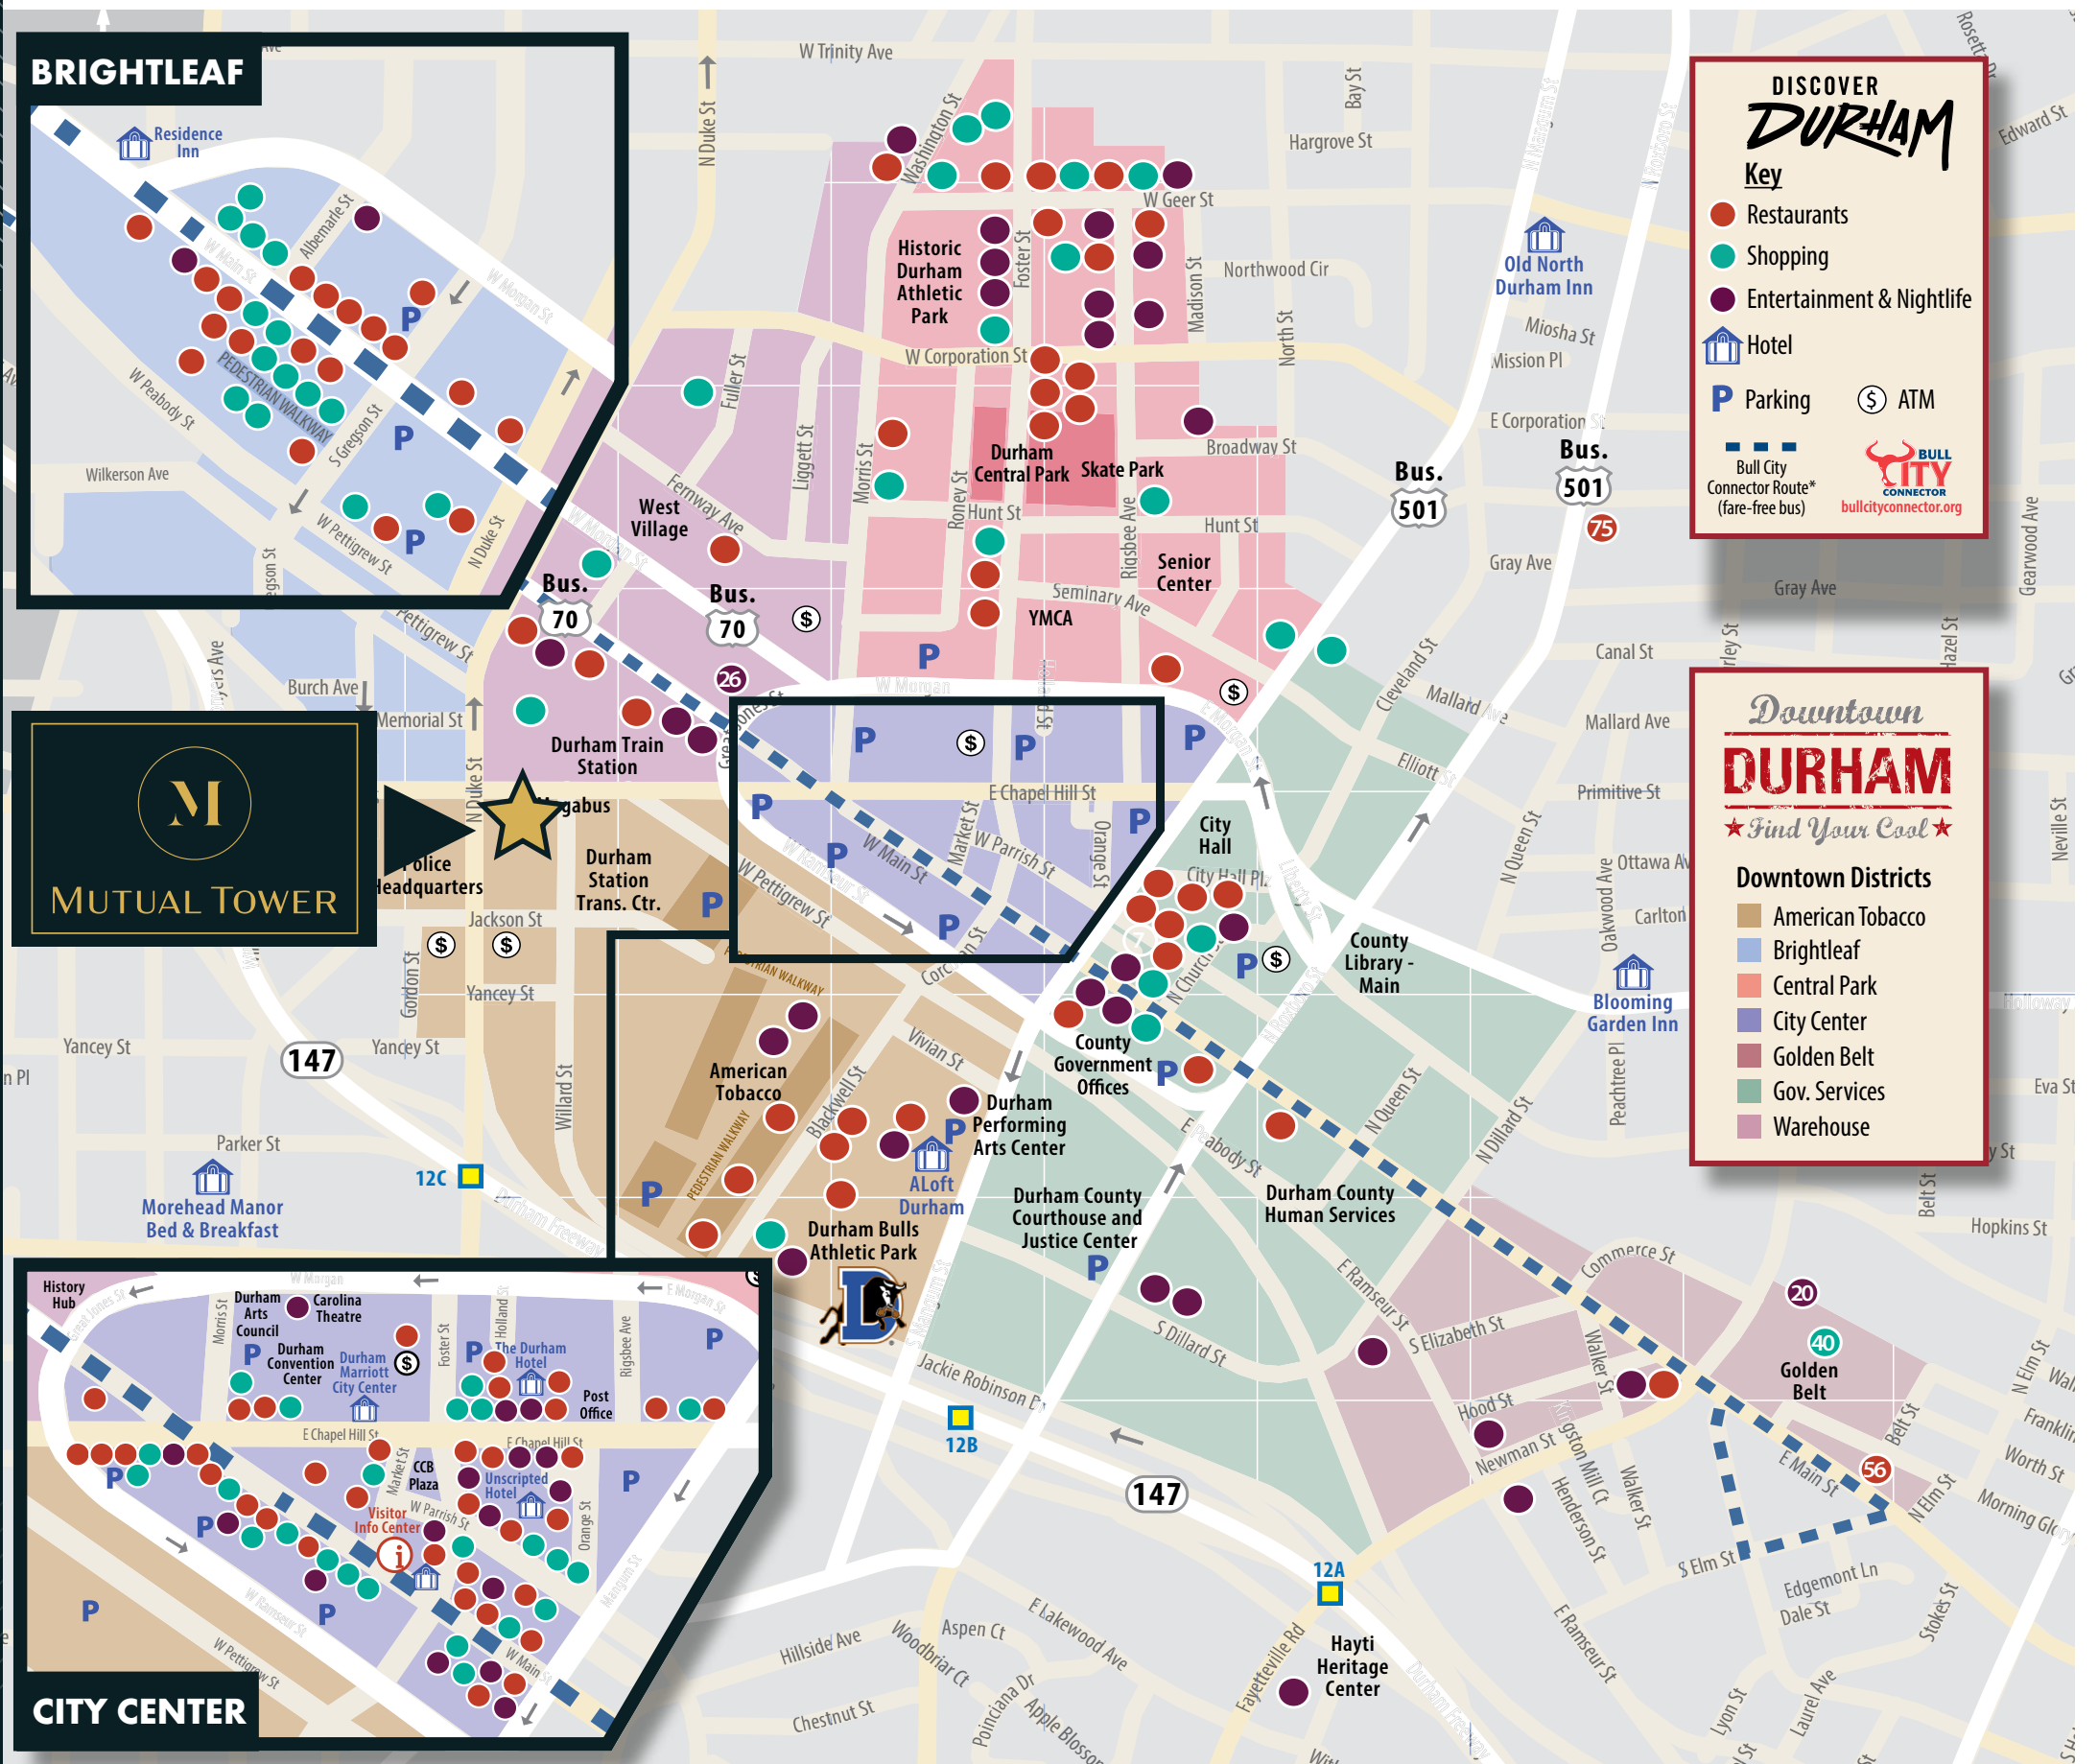

For much of the 20th century, North Carolina Mutual was the largest Black-owned company in the United States, serving the needs of over two-million Americans through employment, mortgages, and premiums in its first 115 years.

As NC Mutual outgrew its original headquarters on Durham's famed Parrish Street, the company acquired land that once housed the Duke family estate, building a thoroughly modern headquarters tower in 1963 - now Mutual Tower. The NC Mutual headquarters was not only the tallest building in Durham until 1987, but also the tallest Black-owned building anywhere in the U.S.

Easily accessible to everything Durham has to offer

Centrally located in Downtown Durham with a **Walkscore of 93**, Mutual Tower is as in-the-mix as it is on the city's cultural map. The building is just steps from dozens of shops and restaurants, and offers immediate access to NC-147 with connections to I-40 and I-85.

A comprehensive approach to well-being

Ownership has invested **\$6 million to fully overhaul and replace the building's HVAC system**, creating a quieter, more efficient, and importantly, cleaner indoor environment to tenants, their employees, and their guests.

Ownership believes Mutual Tower is **one of the best ventilated office buildings in North Carolina**.

FULL HVAC REPLACEMENT THAT PROVIDES AMONG THE CLEANEST AIR OF ANY OFFICE BUILDING IN NORTH CAROLINA

- Increased ventilation - #1 recommendation of CDC
 - Up to 100% fresh air
 - Nearly double the air changes required by code
 - Continuously monitored air quality and responsive system
- MERV-13 filtration - #2 recommendation of CDC
- Phenomenal Aire air cleaning technology which uses needlepoint bipolar ionization to neutralize viruses and pathogens; kill mold, bacteria, and fungi; and eliminate odors and smoke – Mutual Tower is likely the only building in Durham utilizing this technology
- Nighttime Purge Sequence ensures the building starts each day with air free of any human contaminants. This is the #1 recommended control sequence by ASHRAE to reduce transmission of airborne pathogens like COVID-19
- Smart controls over individual tenant zones, including from a smartphone
- System efficiency – 30% energy savings versus a typical office building
